

brunner ::

A high-angle, close-up photograph of a minimalist dining table. The table is a light, neutral color with rounded corners. On the table, there is a small, light-colored ceramic cup with a handle and a white, shallow plate. The background shows a tiled floor and the leg of a white chair.

01

Product idea.

Thinking about tomorrow, today.

The Brunner nate, nate s and boards ranges plus bistro and standing tables from the break ranges are now even more sustainable thanks to the revolutionary Kvadrat Really table top from Danish textile manufacturer Kvadrat. For example, attractive table tops are made from textile waste and bio-based, recycled bonding agents. This saves CO₂, conserves resources, protects the environment and is ultimately completely circular. Really.

Finally. A waste-free concept for table tops.

- Revolutionary table top made from textile waste
- A transparent melamin surface securing long-lasting durability
- Free from colourants, water or chemicals
- Impact-resistant ABS edge or BK round-edge (light oak, pure oak) on selected models
- Available for the following Brunner ranges: nate, nate s, boards, break

Practical and long-lasting.

Kvadrat Really table tops are made of old textiles and wool from the fashion and textile industry, from industrial laundries and waste cuttings from Kvadrat. In addition, they are up to 100% recyclable and manufactured without the use of colourants, water or chemicals.

The practical and long-lasting surfaces fulfil the highest industry standard for waste: Category 5. They are therefore suitable for all level surfaces that need to be resistant to scratches and liquids.

Certifications.

Kvadrat Really fulfils the RCS Recycle Claim Standard that focusses on transparency throughout the supply chain, legally documented suppliers and the traceability of old textiles.

Fire protection regulations: Kvadrat Really fulfils building material class D – s1, d0 according to DIN EN 13501-1 (normal flammability).

Cleaning and maintenance.

Regular cleaning with a dampened cloth is recommended to maintain a long-lasting surface.

Desinfection of the Kvadrat Really Tabletop is also possible, as the A-side has been tested with 48% alcohol.

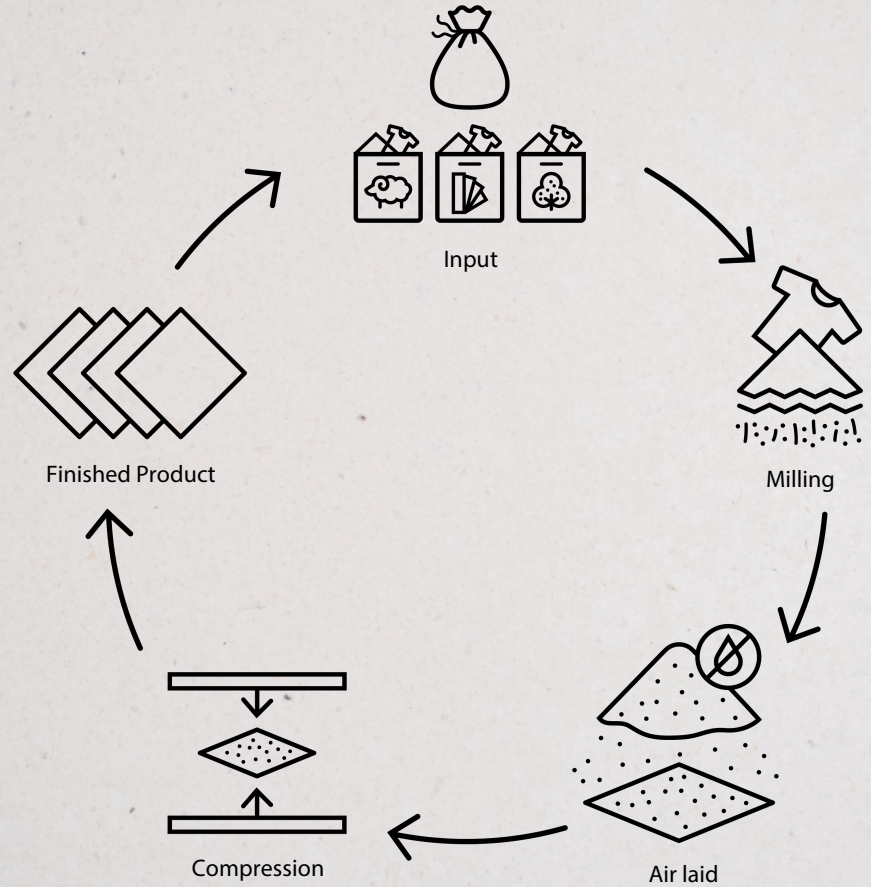

Additional information is available in our cleaning and care instructions available on our website: www.brunner-group.com.

Environmental benefits.

- Material design with little impact on the environment: minimal CO₂ footprint of 13.3 kg CO₂e / m².
- Classified as low-emission material according to current building standards, certified for open-plan and private offices.
- Closed-loop economy: fully recyclable.
- The energy required for production is obtained from renewable energy sources. No residual waste is produced during the manufacture of the textile table tops and no water is used.
- Waste composition: For Kvadrat Really table tops measuring 80 x 160 cm, the equivalent of 70 t-shirts or 30 pairs of jeans are recycled.
- Environmentally friendly binding agents designed for the closed-loop economy.

Kvadrat Really Closed-loop economy.
