# Perfectly rounded, softly padded.

Modern offices are increasingly being designed as inviting meeting spaces with the feel-good factor. Co-working spaces, central areas and lounges are becoming more important than ever.

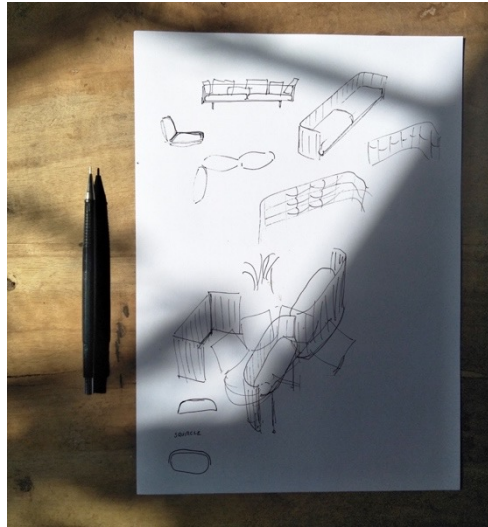

And this is exactly where oval comes into its own. The comfortable lounge system is made for creating ideal settings for communication, networking and relaxation.

“oval feels a little like sitting in front of the fireplace at home.”

JÜRGEN LAUB

The series featuring high-quality upholstery was designed in collaboration with Stuttgart-based design duo jehs+laub. Its 'non-corners' are what makes it so unique. The oval rounding of the seats that gives the series its name makes a refreshing change from the usual square and boxy designs.

The gently rounded benches, islands, lounge chairs and stools can be combined to create inviting seating landscapes to suit the space. There are so many versions and possible combinations to choose from to make a space as open, relaxed or private as required.

“oval is designed  
to create spaces  
where people can meet up,  
hang out and work on their  
ideas together.”

- Design flexibility thanks to the customised colour selection for cushions, seats and backs, with the option of elaborate joint stitching and different frame variations
- Armchair, meeting booth and tables complete the range
- Ideal for lounge and waiting areas, co-working spaces, libraries and many other public areas

# Variety with a consistent design language.

oval benches

oval is available as a bench in multiple configurations, e.g. a straight oval or rectangular two- or three-seater, with low or high panels, casters or an integrated tray table.

# One all to yourself.

oval single seaters

The oval single-seater is versatile enough to be used as a stool, armchair or high-back chair, with or without casters and a tablet table, depending on the user's needs. It is just as flexible as the straight oval benches in terms of configuration options.

# Perfection all round.

oval seating islands

At the heart of the action but all alone: The oval seating islands with their tall panel cross provide privacy from neighbours while maintaining visibility of the surroundings.

# Ahead of the curve.

oval curved configurations

Curved oval multi-seating options can be arranged in various configurations to suit different situations and encourage community, belonging and a sense of well-being.

# A place for concentrated comfort.

oval booth

Step inside a private booth with an integrated table and get to work. High panels in a gently curving 'U' shape – with optional media integration – surround the high-quality fully upholstered arrangement. Soft cushions invite up to six people to lean back in comfort and focus on important meetings.

# Ultimate comfort.

Everything about oval is warm and welcoming. Its premium moulded foam upholstery and pocket spring core insert promise ultimate comfort.

Plush cushions and fully upholstered backs provide plenty of support.

# Stylish oval design.

A design-defining and stylish transverse seam embellishes the seat upholstery and high panels.

As an alternative to the standard double seam all around the seat element, attractive leather joint stitching can be used to create additional accents.

# Colour customisation.

The chosen combination of seat elements, panels and cushions gives oval seat configurations structure and character.

And each of those elements can come in a different colour. This means that each oval configuration can feature one to three colours.

# Frame variety.

oval comes in a low lounge height (42 cm) or an ergonomic seat height (46 cm), making it just right for different settings and situations.

The slimline frames made from powder-coated steel tubes give each oval piece a lightweight look and almost floating feel. A detachable oak tube adds to the furniture's homely appeal.

Depending on the configuration, there is also the option to make oval even more versatile by adding casters.

# Practical extras.

oval upholstered furniture can be upgraded with swivelling tablet tables and electrification boxes under the seat elements to enhance the user experience even further.

Optional partition walls can be added to seating islands for private conversations.

oval double combinations with back panels can also come with a built-in table in the middle, with various materials to choose from.
