Product idea.

Effortless interior design.

With pads, we have successfully developed a kit of upholstery elements for a wide range of scenarios. The new modular seating landscape embodies the

“shake-up of the old, familiar sofa configurations”, say designers jehs+laub.

Ten upholstery elements plus panels and an electrifiable side table have been created, to be combined in an almost infinite number of ways.

Also included in the range:

A range of convertible sofas in a matching design.

Create new connections.

The pads concept:

Breaking down strict seating ranges with seating elements in various heights. Individual elements fit together, opening up completely new seating options such as standing against a seat back.

Contrasting colours also highlight the concept of intersection and integration. Of course, all the tones work together too.

**Sitting briefly on the back?
Go ahead, with pads
it's encouraged!**

Everything goes together here.

Upholstered modules in various shapes, heights and dimensions can be combined with partition walls to create individual seating islands.

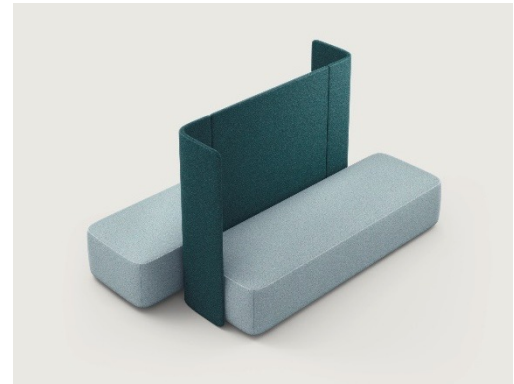

Linger at standing seats. Work dynamically.
Or use as a sanctuary. With pads, you can do it all: sit together, but also at a distance.
So pads is a great response to the questions that tomorrow's world of work will need to resolve.

Seating landscapes can be effortlessly adapted to every room layout – for central areas, co-working spaces, waiting and lounge areas.

“pads playfully incorporates different structures to create interesting new approaches to sitting, working and communicating.”

jehs+laub

Every element represents attention to detail.

All upholstery elements are unified by a **characteristic and circumferential zigzag seam**. As a central design element, it not only provides a consistent link, but also represents Brunner's customary passion for detail.

The zigzag seam is available in eight different colours.

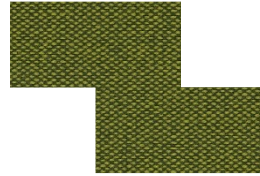

Play with colours and fabrics.

No matter which colour and fabric variety is chosen, monochrome and orderly or bright and varied, pads are always an eye-catching feature.

When it comes to the design of the upholstery elements, panels and cushions, we offer a varied selection of fabrics with rich textures and sleek surfaces that expertly emphasise the dimensions of pads furniture.

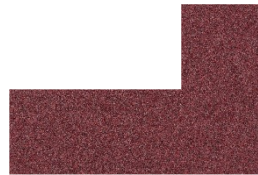

In addition to an attractive appearance, our fabrics also impress with their internal properties such as easy-care and sustainable materials. The majority of our fabrics are certified according to Öko-Tex Standard 100, the EU Ecolabel or Greenguard.

Upon request, pads is also available with flame-retardant materials.

For the ultimate
flexible comfort
in the office.

pads is reclaiming the office: While the new sofa creates a convenient, comfortable meeting point for casual get-to-gethers, the mobile chair is quickly within reach – whether on glides or casters, with or without armrests, optional writing tablet and depending on the version with a handle in the back. Single-colored, two-tone, in a combination of fabric and leather, the cover options create visual variety in the workplace.

The dice are rolled.

Whether on gliders or casters for dynamic seating – this stool always provides flexibility and comfort. As the perfect addition to armchairs and sofas from the pads collection, it combines mobility and comfort in a stylish way. Ideal for lounge and waiting areas, co-working spaces and wherever additional seating is welcome.

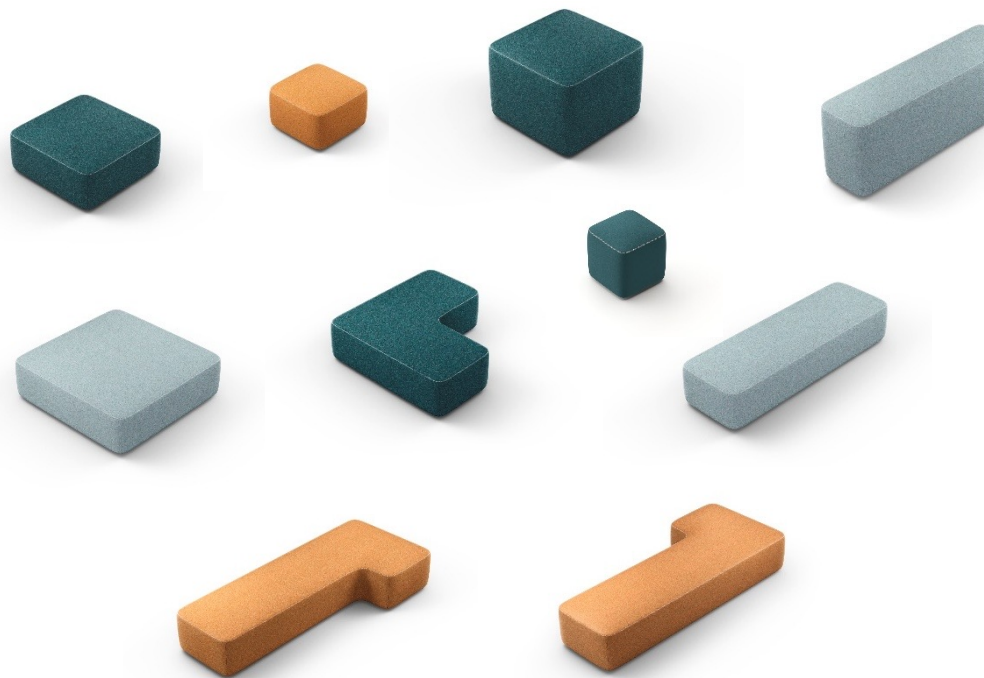

02

In detail.

A kit of upholstery elements.

The pads range is made up of **ten upholstery elements** in various shapes and sizes. These elements can be used individually or in unique combinations for flexible zoning and interior design.

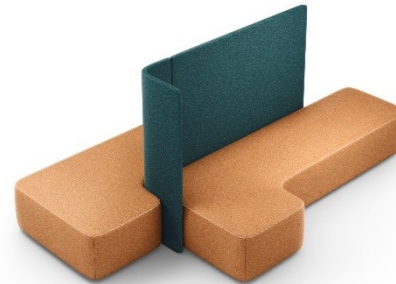

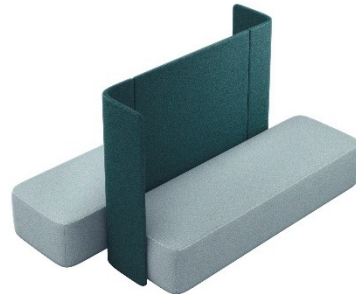

Cubes, L-shaped and rectangular upholstery elements with a seat height of 45 or 48 cm and a back height of 78 cm invite you to linger on convenient, comfortable surfaces.

Panels offer extra privacy.

When used in combination with **fully upholstered panels**, upholstery elements can be effortlessly converted into private sanctuaries. The sleek double seam on partition elements has been colour matched to the cover fabric.

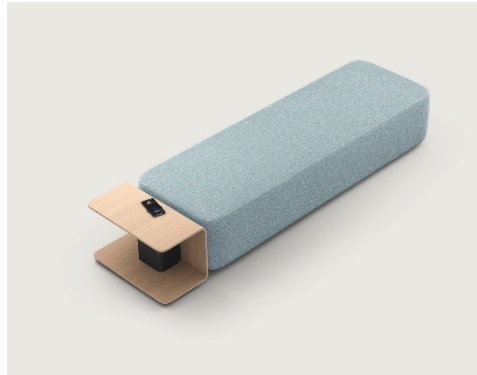

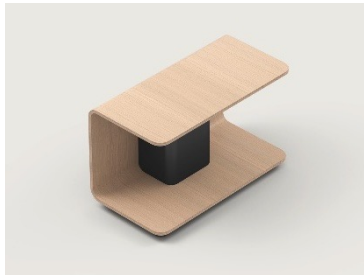

Standing at a height of 130 cm, the panels are available in various shapes, each perfectly tailored to the geometry of the upholstery elements. This allows the V-shaped panels, for example, to be used not only as a back, but also to create additional separate

Seating islands are attached securely for maximum stability and safety in everyday use.

Matching accessories for maximum functionality.

As the final piece in the puzzle, **cushions** and **side tables** complete the harmonious pads look. And the opportunities for working and communicating offered by pads are just as varied.
